PROFESSIONAL SUMMARY

Python Full Stack Developer with 1 year of hands-on experience in designing, developing, and deploying web applications. Proficient in Python, Django, Flask, HTML, CSS, JavaScript, React.js, and SQL databases. Skilled in developing REST APIs, database integration, authentication, and responsive web applications. Experienced in working with CRM and business management applications. Good understanding of Git, API testing, Docker, Linux, and application deployment. Strong problem-solving and debugging skills with a commitment to developing clean and maintainable code.

TECHNICAL SKILLS

Programming	**:** Python, JavaScript, HTML5, CSS3
Frameworks	**:** Django, Flask, React.js, Bootstrap
Database	**:** PostgreSQL, MySQL, MongoDB
Libraries	**:** NumPy, Pandas
Tools	**:** Git, GitHub, Postman, Docker
API	**:** REST API, Django REST Framework
Operating Systems	**:** Windows, Linux (Ubuntu)

WORK EXPERIENCE

TAMIL INFO TECHNOLOGY | | Jan 2026 – Present

Project: CRM System (Lead & Sales Management)

Roles & Responsibilities

- Developed and maintained a Python full-stack CRM application using Django/Flask to manage leads, sales pipelines, and customer interactions.
- Designed and implemented RESTful APIs for lead creation, assignment, follow-ups, and sales status tracking.
- Developed responsive user interfaces using React.js, JavaScript, HTML, CSS, and Bootstrap.
- Implemented business logic for lead lifecycle management, including lead qualification, conversion, and deal closure workflows.
- Integrated PostgreSQL/MySQL databases for managing customer, lead, and sales information.
- Implemented authentication and role-based access control for sales executives, managers, and administrators.
- Used Git and GitHub for version control and collaborative development.
- Used Postman for REST API testing and debugging.
- Worked in an Agile development environment for feature development, testing, and

bug fixing.
- Deployed and maintained applications in Linux (Ubuntu) environments.
- Used Docker for application deployment and environment configuration.
- Performed basic database query optimization and application performance improvements.

PROJECT

CRM System – Lead & Sales Management

- Developed a full-stack CRM application for managing leads, customers, sales pipelines, and follow-ups.
- Built REST APIs using Django/Flask for lead management and sales operations.
- Created dynamic and responsive screens using React.js, JavaScript, HTML, CSS, and Bootstrap.
- Implemented lead qualification, conversion, follow-up, and deal closure workflows.
- Integrated PostgreSQL/MySQL for storing and managing application data.
- Implemented secure authentication and role-based access control.
- Tested APIs using Postman and managed source code using Git/GitHub.

Education

GTN ARTS AND SCIENCE COLLEGE | Dindigul
B.Sc. Chemistry | 07/2021 - 04/2024
